PROMOTERS

ITALIAN TRADE AGENCY

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion, and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world. The Italian Trade Agency in India was established in 1969 and we are present with two offices in New Delhi and Mumbai.

The size of India's imports of wire and cable making machinery from the world stood at € 142 Mn in the calendar year 2021. Italy is the 2nd most biggest trading partner for India, exporting around € 13 million of Wire and Cable Machinery to India. In the current CY 2022, within the current period January - August, Italy has exported around € 6.60 million of Wire and cable machineries to India.

I take this opportunity to express my heartiest congratulations to Messe Düsseldorf India Pvt. Ltd. for organizing Wire India 2022 and wish all the exhibitors and visitors valuable and fruitful meetings and success.

Dr. Alessandro Liberatori
Italian Trade Commissioner

The ACIMAF was founded in Brescia, Italy, in 1987 for the purpose of promoting the image of Italian technology in the sector of machines and products for the wire and cable manufacturing industry. It is a non-profit voluntary association and plays an important international role of cooperation in improving the location and organisation of the major wire and cable trade fairs. The ACIMAF also makes proposals and works constructively to improve coordination between its member companies and the Institute of Foreign Trade (ICE) and promotes marketing activity aimed at penetrating the markets of the more profitable geographical regions.

Atomat S.p.A. is an Italian Company founded in 1968 in Remanzacco (Udine) where the headquarter is currently located and where production capacity and worldwide reputation are constantly improved. The Company is a worldwide leader in rolls and CNC machines (lathes, grinders and notching machines). Atomat S.p.A. designs and manufactures rolls in steel and tungsten carbide for a wide range of applications with comprehensive know-how and a really high-quality standard. Cutting edge equipment, highly qualified personnel, consolidated collaborations with the most important European steel suppliers, along with flexibility and hard work allowed Atomat S.p.A. to be recognized as one of the most prominent companies in rolls production.

DEM SpA provides technology to form ferrous and non-ferrous metals, transforming rod and wires into shapes. Its core activity lies in cold rolling: flat and profile rolling mills, cold rolling lines, cold rolling cassettes and micro rolling cassettes. Also, auxiliary equipment as pay-offs, take-ups, cleaning modules, Flux Cored Wire lines, micro-mills for “warm” rolling as well as Spring Wire lines are within its range of solutions.

Eurotek has been designing and manufacturing extrusion heads for more than three decades for companies specialising in the production of electric cables, pipes and manufacturers of extrusion lines.

Eurotek's extrusion heads can cover a range of products from a diameter lower than 1 mm up to 300 mm, which are suitable for:

- processing relatively ductile polymers such as PE, PP, PVC, PU, HFFR etc
- processing polyamide or nylon
- the extrusion of various types of pipes
- process fluoropolymers, i.e. high-performance compounds resistant to acids and solvents
- process rubber, silicone rubber and silicone
- make fiber optic cables such as tight, semi-tight, loose, simplex, duplex zip-cord, fire-resistant buffered loose cables.

Eurotek carries out a 360° rheological study, on each extrusion head. Includes a flow simulation that permits the material/ compound behaviour to be visualized at every point in the process, starting from the extruder output to the tooling area. Prototyping, designing, construction and testing, every step in the development of our products from the initial customer request is followed within our company. The know-how acquired through years of experience in the field, the availability of qualified and up-to-date staff and state-of-the-art machinery, the propensity for constant innovation and the attention dedicated to each customer, allow us to provide dedicated services and highly customized products. Eurotek guarantees to the customer constant support both in the pre and post-sale phase. It also has an international network of agents, process and plastics experts to support customers all over the world.

M+E specialize in the design and manufacturing of pay-offs and take-ups for steel and stainless steel wires in coils or on spools for annealing, patenting, galvanizing, oil tempering and other in-line processes, with long experience in the steel-cord industry.

M+E also manufacture wet drawing machines (for ultra-fine wire, saw wire, steel cord, spring wire, rope wire, staple and clips wire) for steel and stainless steel wire complete with horizontal or vertical axis spoolers.

M+E together with his daughter company Sirio Wire, specialist in wire surface treatment (cleaning, pickling, plating and coating) supplies complete lines for production of bronze coated wires, stainless steel wires and electroplated wires.

H96A

MFL GROUP is a leading global company providing industrial machinery, which contributes to the success and growth of wire, cable and rope manufacturers.

For 125 years, MFL Group has invented the future of Wire Drawing, Stranding-Screening-Armoring and Extrusion Machinery, and today the company offers complete vertically integrated turn-key solutions that include digital applications required to unlock the entire value of an industrial machine.

The company has grown organically and through several acquisitions, which have played a role in the steady expansion of the product offering. MFL Group's excellence is driven by roughly 450 employees which together serve customers in more than 100 countries around the world.

Don't miss the chance to meet MFL Group team at WIRE India, booth number H96A Hall 1.

Our team would be happy to help you with your queries and suggest the right solution to fit your needs and your business goals.

Newtech is a company, incorporated in 2003, active in the field of wires insulation. Its partners and the majority of employees are coming from major firms in the same line of business. The present owners, when creating a new firm, were aiming to join the experience gained in their previous positions with a fresh start, featuring a lean structure supported by a strong network of information technology, a scientific approach to design and a strong will to succeed. In a short period of time, Newtech has developed a remarkable number of equipments for insulation of copper and aluminum conductors and a line of machines for the insulation of copper conductors with fiber glass. The after sales department is made of engineers with solid experience in machine commissioning and insulating technology, most of them coming from magnet wire plants. Our aim is to become a partner of our customer, building long term relationship based on prompt assistance when the need arise. Our efforts have been rewarded by a number of successful sales in Africa, India, Middle , Far East, Russia, America West and East Europe.

PRODUCTS
Over the years OMAS has developed many technologies, creating a product catalog of steel forming machinery in the following order to cover every customer's need:

- DECOILERS
- WELDED RINGS
- MULTIROLL
- SPECIAL SERVO PLANTS

WHO WE ARE
OMAS SpA is a family-run company that has been in the steel forming machinery business for over 60 years. It is a leader in the design and production of high-quality machinery for the steel industry. The company's products are used in a wide range of applications, from the production of steel wire to the production of steel strip. OMAS SpA is a member of the OMAS Group, which is a leading manufacturer of steel forming machinery in the world.

OUR PRODUCTION SITE
The production site is located in the town of Airuno, in the province of Lecco, Italy. It covers an area of over 10,000 sqm and is equipped with modern machinery and technology. The site is managed by a team of experienced professionals who ensure the highest quality of production.

SERVICE
OMAS SpA is equipped with a service team that is available to assist customers in every way. The team is composed of experienced professionals who are trained to provide the highest quality of service. They are available to assist customers with the selection of machinery, the installation of machinery, and the maintenance of machinery.

STOKKERMILL

RECYCLING MACHINERY

E101

Stokkermill - ITALY, is the European leader in the design and manufacture innovative machinery and plants for the recycling of waste materials industry. Based in Italy; doing business for more than 20 Years, our Recycling machinery are tailored to suit specific customer requirements. Research and Innovation is our strength along with a worldwide customer service network. We have a wide range of recycling equipment such as single-shaft/twin-shaft shredders, hammer mills, refining and sorting machines for the clean high-grade separation of recyclable commodities. Our equipment is specially customized for the Indian market to emphasize on reduced operational cost and higher profit margins for the end user. We specialize in recycling different types of cables such as telecommunication cables, car wiring harnesses armoured cables. We offer small to medium-sized cable recycling plants from 50 kg/h up to 2000 kg/h. We are currently concentrating on the recycling of WEEE and electric motors due to the increased volume of E-waste and motors and maximized the value of waste. We offer a complete turnkey solution for Ewaste turning low value scrap to high grade raw materials. Stokkermill offers various solutions to meet the special needs of customers.

KONER

TECNOVO

Koner is a leading company in the field of drawing dies. It is committed to a policy of research and innovation both with regard to process and die technology and constantly seeks to co-operate with customers and to provide them with complete solutions.

Koner produces:

- Tungsten carbide dies for drawing dies
- Tungsten carbide drawing dies
- Pressure dies
- Tungsten carbide wire guides, bushes rings and dies
- Know-how for the manufacture and reconditioning of drawing dies

Tecnovo has been producing lubricants and auxiliary chemicals for wire drawing and processing since 1945. Tecnovo provides full and prompt technical assistance which starts with the selection of the right products and goes right through to testing on the customer's plant with its own specialist personnel.

Tecnovo produces:

- Techodren: Powder lubricants for dry drawing
- Slater: Oils and liquid compounds for wet drawing
- Tecnoval: Pastes and greases for wire drawing
- Tecnodam: Products for wire rod and wire rolling
- Tecnofluor: Products for cleaning and degreasing
